EXPERIENCE

AI Engineer

The Botss

Nov 2025 – Present

Karachi, Pakistan

- Designed and deployed AI chatbots, automation tools, and backend APIs for multiple projects.
- Translated vague business requirements into clear, structured AI solutions and workflows.
- Resolved chatbot latency and accuracy issues by optimizing RAG pipelines, caching, and query processing.
- Improved system stability and reduced errors by implementing edge-case handling and fallback logic for user queries.
- Enhanced analytics reliability by building automation tools to reduce manual monitoring and operational overhead.
- Deployed AI services on cloud platforms, optimizing for scalability, reliability, and cost-efficiency.

AI Developer Intern

The Botss

Sept 2025 – Nov 2025

Karachi, Pakistan

- Developed a legal AI chatbot using Retrieval-Augmented Generation (RAG) for fast, accurate legal document retrieval.
- Resolved document processing bottlenecks by implementing chunking, vector embeddings, and semantic search for large datasets (6,000+ statutes, 100,000+ judgments).
- Optimized real-time AI chat and voice systems by improving concurrency handling, reducing latency, and enhancing API reliability.
- Modified database schemas and RESTful APIs to support scalable AI applications and ensure secure data handling.

SKILLS

Languages Python, JavaScript, TypeScript

Frameworks FastAPI, MERN Stack (familiar with React, Node.js, Express)

Databases MongoDB, PostgreSQL, Supabase, Vector Databases

Tools OpenAI, LangChain, Gemini, PyTorch, Elevenlabs, Twilio, Render, N8N, Git, GitHub

PROJECTS

Legal AI Chatbot for Pakistan Laws

[View Project](#)

- Developed an AI chatbot for legal search and summarization.
- Used vector embeddings for accurate semantic retrieval.

IWM CRM: Pharma Vendor CRM with AI Human Calls

[View Project](#)

- Developed a CRM platform for pharma vendors with full lead and team management.
- Integrated Twilio for human-to-human calls with automatic transcripts and summaries.
- Built AI agents for automated lead interactions using a knowledge base, with call summaries.
- Enabled messaging and email (inbound/outbound) directly within the CRM interface.

Audifyer: AI-based Voice Cloning & TTS System

[View Project](#)

- Developed FastAPI-powered PowerPoint-to-video conversion engine with AI voiceovers, 6+ TTS providers, voice cloning, and 29+ languages using PyTorch, Transformers, and FFmpeg
- Built scalable backend with PostgreSQL and async processing, implementing frame-accurate synchronization and GPU optimization, achieving 100% animation extraction accuracy.

EDUCATION

Bachelor of Science in Artificial Intelligence, Dawood University of Engineering & Technology 2024 – 2025
Karachi, Pakistan

CGPA: 3.74 / 4.0

Key Areas: AI, Machine Learning, Deep Learning, NLP, Software Engineering

ACHIEVEMENTS & CERTIFICATIONS

- Runner-up, University Project Expo (Chatbot Development)
- Google AI Essentials (Coursera)
- Gen-AI & Chatbot (Saylani Mass IT Training)
- Mern-Stack (Hazza Institute)
